SCIENTIFIC PROGRAM

January, 16, Friday

- 17.00 - 17,15 Welcome to participants
17,15 - 18,00 A. J. Pombeiro, *IST, Lisbon, Portugal*, "Complexes with N- and O- ligands in the catalytic partial oxidation of alkanes"
18,00 - 20,00 PRIN Group Communications

January, 17, Saturday

- 09.00-10.00 K. Binnemans, *University of Leuven, Belgium*:
"Luminescence in Liquid Crystal Metal Complexes"
10.00-11.00 PRIN group communications
11.00-11.30 Coffee Break
11.30-13.30 PRIN group communications
13.30 Lunch

15.00-16.00 J.A.R. Navarro, *University of Granada, Spain*:
"Biosupramolecular chemistry of coordination assemblies"
16.00-17.30 Oral communications
17.30-19.00 PRIN group communications
20.00 Social Dinner

January, 18, Sunday

- 09.00-10.00 T. Devic, *University of Versailles, France*
"Tuning the sorption selectivity in porous coordination polymers: the role of the organic part"
10.00-12.00 PRIN group communications
12.00 Conclusions

SCOPE

The aim of this workshop is to gather contributions on different aspects of MOF, coordination polymers and hybrid material science.

Leading groups in this field will present their work on characterization, preparation and applications of new polynuclear or polymeric coordination complexes.

VENUE

The workshop will be partly funded by the University of Camerino.

The Registration Fee is 130,00 euro

ORGANISING COMMITTEE

Augusto Cingolani, University of Camerino
Claudio Pettinari, University of Camerino

SCIENTIFIC COMMITTEE

Norberto Masciocchi, Insubria University, Como
Luciano Pandolfo, University of Padova
Claudio Pettinari, University of Camerino
Daniela Pucci, University of Calabria
